

## **Registro nazionale Italiano Donatori Midollo Osseo**

Italian Bone Marrow Donor Registry

### REGISTRATION OF INTERNATIONAL PATIENTS IN IBMDR

The IBMDR can accept request on the behalf of international patients only if coming from a National Registry (Hub), or directly from an EBMT accredited TC in absence of a National Hub.

Any preliminary inquire and formal search request have to be sent to the IBMDR through EMDIS (European Marrow Donor Information System).

In case the registry is not EMDIS connected, use the appropriate form (RC 301).

The IBMDR is the sole intermediary between the Requesting Center and Donor Center/Cord Blood Bank; all the communications must be addressed to the IBMDR, except for what specified in #16.8 of IBMDR STANDARD.

The international Transplant Center, after having performed a BMT using an IBMDR donor or cord blood unit, must update the IBMDR about the patient's health - RC311 form.
